

Basic Skills Qualification Endometrial Biopsy

Evaluation Process

Prior to seeking BSQ certification, a resident should be confident in their skills. The “Basic Skills Qualification” is printed and given to the supervising physician, where after, the resident performs the procedure under direct observation of the supervising physician. The competency assessment is completed by the supervising physician with their signature and given back to the resident. The resident then returns the competency assessment to the Academic Coordinator.

Resident: _____

	Competent	Needs Work
